EXPERIENCE

Front-end designer

Smartwary.bg

03/2019 Sofia, Bulgaria

Redesigning dvetelepti.com was my first work on a commercial project and my assignment on it was to make every page mobile friendly as it was already done for the desktop version.

- the header and the menu were simplified and adapted for mobile
- for mobile, the carousel was replaced with displaying each category instead
- added grid gallery on the homepage and new design for login page
- user profile, campaigns, single campaign and additional tweaks for all pages were made for mobile

Compared to the other two, this is only a design of an online shop, completely made by me to show how well I have learned some of must have skills of CSS.

- the overall layout is made with Flexbox and for the gallery part I used CSS Grid
- while working on it I also got very familiar with preprocessors like SASS and SCSS and used the second one for more efficient styles writing
- also, every part of the website is mobile responsive down to 320px width

Awesome Cars Media

SoftUni

08/2018 Sofia, Bulgaria

The project is very similar to the previous one. The main difference being instead of using React I needed to achieve the same functionality with Angular 6. Some of the new stuff I got familiar are listed below.

- Interceptors and observables
- Angular pipes and guards
- TypeScript

This is a project made with ReactJS, as the final project of the course I was on. Below are the things I utilized while doing it.

- used the router of react to made URLs works properly, also how to guard them
- learned how components work with each other and how they exchange information to their child or parent component
- utilized the forms in order to send information to the remote back end - kinvey.com

EDUCATION

JavaScript Web Developer

SoftUni

2017 - 2019 Sofia, Bulgaria

I have successfully completed the whole curriculum of JS developer at SoftUni and those are some of the most notable courses.

- ExpressJS Fundamentals
- ReactJS Fundamentals
- Angular Fundamentals

SUMMARY

I can make your design idea into a fully responsive website while following the proper design patterns.

TECHNOLOGIES

Coding

angular react NodeJS git

SCSS MongoDB jQuery

gulp handlebars HTML

Design

Adobe Photoshop
