EXPERIENCE

Software Engineer

Freelance

📅 11/2018 - Present 📍 Sofia, Bulgaria

For the last year, I have been working as a freelancer on various projects of different sizes. These includes some of my notable points.

- builded System back-end Architecture and Technical design with .Net
- written unit and front-end automation tests for the purpose of achieving robust applications
- earned tremendous trust and satisfaction to my clients from delivering their products on time

Full Stack Developer

Princess MOA

📅 08/2016 - 10/2018 📍 Sofia, Bulgaria

I had the opportunity to learn from some of the best people in the industry and for about 2 years I have come a long way in my professional carrier path.

- I have worked extensively almost from the beginning on building an app for a document management system with Angular
- the following project was with react and node.js, and it was about a small social network for the company's personnel and it went really good
- was a mentor at the new developers and helped improve their skills

Front-end designer

Smartwary.bg

📅 03/2016 - 06/2016 📍 Sofia, Bulgaria

Redesigning dvetelepti.com 🔗 was my assignment on this charity related website. My part of the project was to make every page mobile-friendly as it was already done for the desktop version.

- the header and the menu were simplified and adapted for mobile
- for mobile, the carousel was replaced with displaying each category instead
- added grid gallery on the homepage and new design for login page
- user profile, campaigns, single campaign and additional tweaks for all pages were made for mobile

EDUCATION

JavaScript Web Developer

SoftUni

📅 2017 - 2019 📍 Sofia, Bulgaria

I have successfully completed the whole curriculum of JS developer at SoftUni and those are some of the most notable courses.

- ExpressJS Fundamentals 🔗

SUMMARY

I can make your design idea into a fully responsive website while following the proper design patterns with some of the best technologies to date.
